INTERSTATE ENERGY COMPANY (IEC) PURPOSE AND ENERGY MARKET SERVED

Interstate Energy Company, an oil and natural gas pipeline company, operates and maintains two pipelines in Pennsylvania that transport oil and natural gas to the Martins Creek and Lower Mount Bethel power plants in Northampton County, Pa. Nitrogen is used for product separation and displacement.

The Lower Mount Bethel power plant generates electricity by burning natural gas, while the Martins Creek plant can burn oil or natural gas to generate electricity. This allows Talen Energy to choose the most cost-effective fuel to provide electricity to residential and business customers.

IMPORTANT SAFETY INFORMATION

Please keep and share with others

214 Shoemaker Rd.
Pottstown, PA 19464

MAINTAINING SAFETY AND INTEGRITY OF IEC TRANSMISSION PIPELINES

IEC invests significant resources maintaining the quality and integrity of our pipeline systems. IEC also uses periodic aerial surveillance and ground patrols to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. Security cameras at various locations are also continually monitored.

IEC has implemented an aggressive Integrity Management Program (IMP). While federal regulations require an IMP for areas designated as “high consequence areas” (HCAs), IEC applies the program to all areas. For an overview of the IEC IMP, go to our website.

INTEGRITY MANAGEMENT PROGRAM

• 84 mile long, 18” diameter pipeline, 1150 psig, transporting from Marcus Hook to Lower Mount Bethel Twp., Northampton County. This line transports No. 6 fuel oil and No. 2 fuel oil. The portion of the pipeline in Bucks and Northampton counties also transport natural gas which is odorized by suppliers to this transmission pipeline.

• 4.5 mile long, 20” diameter pipeline, 1200 psig, transporting natural gas in Northampton County, which is odorized by suppliers to this transmission pipeline.

IEC exerices its Emergency Response Plan on an annual basis using table-top exercises or simulated on-scene exercises including deployment of equipment. We welcome participation by local emergency officials to help us engage in mutual assistance exercises designed to minimize hazards to life or property. If you or your organization would like to receive more information on our Emergency Response Plan or are interested in participating in our annual exercises, please contact us at info@iec.energy. Also, please visit our website at www.iec.energy for additional information.

PRODUCTS HANDLED IN IEC PIPELINES

Product: Fuel Oil #2 and Fuel Oil #6
DOT Guidebook ID#: 128
Leak Type: Liquid

Vapors/Health Hazards: Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors and sewers. Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.

Product: Natural Gas
DOT Guidebook ID#: 115
Leak Type: Gas

Vapors/Health Hazards: Easily ignited by heat, sparks, or flames and forms explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas may cause burns, severe injury and/or frostbite.

Product: Nitrogen
DOT Guidebook ID#: 121
Leak Type: Inert Gas

Vapors/Health Hazards: Lighter than air and generally rises and dissipates. Product is nonflammable and does not support combustion. In high concentrations, may cause asphyxiation.

EMERGENCY OFFICIALS AND PUBLIC OFFICIALS

Interstate Energy Company (IEC) wants to increase your awareness of our pipelines that may be located in your area of jurisdiction. Pipelines are one of the safest modes of transportation for petroleum products and natural gas. However, in the unlikely event of a pipeline emergency, we want to make sure that IEC and you are familiar with each other’s capabilities.

Our transmission pipelines are located in eastern Pennsylvania and deliver the fuel to two power plants operated by Talen Energy in Northampton County. These lines are:

• 84 mile long, 18” diameter pipeline, 1150 psig, transporting from Marcus Hook to Lower Mount Bethel Twp., Northampton County. This line transports No. 6 fuel oil and No. 2 fuel oil. The portion of the pipeline in Bucks and Northampton counties also transport natural gas which is odorized by suppliers to this transmission pipeline.

• 4.5 mile long, 20” diameter pipeline, 1200 psig, transporting natural gas in Northampton County, which is odorized by suppliers to this transmission pipeline.

In the event of a pipeline incident resulting in a product release and/or fire, IEC would call 911 for emergency assistance.

Following are actions IEC would take and the actions that we would rely on emergency responders to take.

<table>
<thead>
<tr>
<th>IEC Actions</th>
<th>Emergency Responder Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shut down the pipeline</td>
<td>Employ Incident Command System</td>
</tr>
<tr>
<td>Respond to scene</td>
<td>If IEC is not on site, call IEC 24 hr. emergency number: 800-747-3375</td>
</tr>
<tr>
<td>Close valves to isolate incident</td>
<td>Identify hazards</td>
</tr>
<tr>
<td>Notify federal, state, local agencies</td>
<td>Evacuate people if required</td>
</tr>
<tr>
<td>Take steps to protect environment</td>
<td>Fight fires</td>
</tr>
<tr>
<td>Provide safety and health hazards briefing</td>
<td>Control traffic and provide security</td>
</tr>
<tr>
<td>Work within Incident Command System</td>
<td>Arrange for medical assistance</td>
</tr>
</tbody>
</table>
